

Environmental policy

KEM ONE's raison d'être is to offer essential, sustainable products derived from salt chemistry, while preserving resources and the climate a little more each day.

Closely linked to Kem One's economic sustainability, its commitment to reducing its environmental footprint is central to its CSR strategy for 2030 and to the company's values. Kem One is taking action to continuously improve its technical performance, in addition to its ISO14001 and ISO45001 certifications, its adherence to the international Responsible Care chemical standard® and its stringent regulatory obligations.

The company's commitments to limiting its impact on human health and the environment are in line with the United Nations' Sustainable Development Goals and are deployed with its stakeholders.

Aware of its responsibility to future generations, Kem One's ambition is to become the global benchmark for the vinyls sector in terms of carbon emissions.

To achieve its objectives, Kem One is committed to 5 priorities for 2030, with 2019 as the reference year:

WATER

-25%

of total volume of water abstracted

Preserving water resources: reducing our water consumption by optimising our production units, and rolling out ambitious recycling projects

AIR

-30%

emissions of non-methane volatile organic compounds (NMVOCs)

Improving the impact of our activities on the environment and on people: reducing our NMVOC emissions using the best available technologies

CIRCULAR ECONOMY

80%

of our waste valorized

Preserving natural resources: making the most of our waste, developing circularity in our value chain, eco-designing our products and packaging

BIODIVERSITY

100%

of our PVC sites are Operation Clean Sweep certified®

Preserving ecosystems: aim for zero loss of plastic particles, reduce our pressure on biodiversity, monitor the quality of our soils

CLIMATE

-40%

greenhouse gas emissions

Reducing our impact on climate change: reduce our absolute greenhouse gas emissions in scopes 1 and 2, and offer our customers 25% of our products with an improved environmental footprint
